ABOUT ME

I'm a librarian-turned-coder looking for a job as a Full Stack or Front End Developer. I work primarily with Javascript/React and MERN stack.

SELECTED PROJECTS

Code for America: Open Oakland (open source) [[Website Link](#)] [[Github Link](#)]

Worked with a team of volunteers implementing features for Funding Public Safety, a project tracking how the city spends public safety funds.

Mastermind [[Website Link](#)] [[Github Link](#)]

A full stack numbers guessing game that features authentication. The app uses bcrypt and jwt to log users in, and stores their score history in a MongoDB database.

Fight (Frontend Contract) [[Website Link](#)]

An esports social network. As a contractor, I implemented new features for the site using Next.js, Redux, and Sass, and helped build out a React Native app from scratch.

Movie Finder [[Website Link](#)] [[Github Link](#)]

An app that pulls movie info from The MovieDB API. Users can search films or see what's currently in theaters or coming soon. Built with React, Typescript, and Tailwind.

Full Stack Demos [[Website Link](#)] [[Github Link](#)]

A collection of three mini full stack applications. Uses a MongoDB database, with a backend hosted on Heroku. Menu Manager and Contact List use full CRUD functionality, while URL Shortener creates and reads. Created using test driven development.

WORK EXPERIENCE (ABRIDGED)

Fight

Frontend (Contract) | Aug 2021 - Present

San Ramon, CA

- Worked with the company's CTO to create a React Native application from the ground up
- Collaborated with other developers to implement product features in Next.js
- Worked on navigation redesign and a profile feature for the desktop's overlay

City College of San Francisco

Librarian | 2017 - Present

San Francisco, CA

- Answered hundreds of reference questions a year and taught library classes at a busy community college library
- Part of the book purchasing team for Computer Networking and Computer Science disciplines
- Helped plan the library's 3D printing lab

TECHNICAL SKILLS

Frontend

Tailwind, Bootstrap, SASS, Javascript, Typescript, React, Next.js, React Native, Context API, Framer Motion

Backend

Node JS, Express, MongoDB, PostgreSQL, GraphQL

Testing and Tools

React Testing Library, Jest, Mock Service Worker, Mocha, Chai, Figma, npm/Yarn, VS Code

Other

Git/GitHub, Netlify, Heroku, UNIX Command Line, TDD, Scrum

Familiar

Python, Flask, PHP

EDUCATION

Master of Library and Information Science

*University of Illinois
Urbana-Champaign, IL*

4.0 GPA. Staffed an on-campus technology help desk and won a faculty-nominated award.

Bachelor of Arts

*University of Illinois
Urbana-Champaign, IL
Major in Creative Writing*
